Preface vii

Review
Polymers for gas separations: the next decade
S.A. Stern (Syracuse, NY, USA) 1

Organic vapor sorption and transport in a thermotropic liquid crystalline polyester
N.R. Miranda, J.T. Willits, B.D. Freeman and H.B. Hopfenberg (Raleigh, NC, USA) 67
Sol-gel strategies for controlled porosity inorganic materials
C.J. Brinker, R. Sehgal, S.L. Hietala, R. Deshpande, D.M. Smith, D. Loy and C.S. Ashley (Albuquerque, NM, USA) 85
Development of TiO_2 membranes for gas phase nanofiltration
R.A. Peterson, M.A. Anderson and C.G. Hill Jr. (Madison, WI, USA) 103
Catalytic platinum-based membrane reactor for removal of H_2S from natural gas streams
D.J. Edlund and W.A. Pledger (Bend, OR, USA) 111
Modification of asymmetric polysulfone membranes by mild surface fluorination. Part I. Transport properties
J.D. Le Roux, D.R. Paul, J. Kampa and R.J. Lagow (Austin, TX, USA) 121
Modification of asymmetric polysulfone membranes by mild surface fluorination. Part II. Characterization of the fluorinated surface
J.D. Le Roux, D.R. Paul, M. Arendt (Austin, TX, USA), Y. Yuan and I. Cabasso (Syracuse, NY, USA) 143
A modified hollow fiber contained liquid membrane technique for gas separation at high pressures
T. Papadopoulos and K.K. Sirkar (Hoboken, NJ, USA) 163
Physical modification of poly[1-(trimethylsilyl)-1-propyne] membranes for gas separation
T. Nakagawa, S. Fujisaki, H. Nakano and A. Higuchi (Kawasaki, Japan) 183
Selectivity enhancement via photooxidative surface modification of polyimide air separation membranes
I.K. Meier, M. Langsam and H.C. Klotz (Allentown, PA, USA) 195
Evaluation of retentate recycle effect on enrichment of less permeable gas component in a membrane permeator
T. Tsuru and S.-T. Hwang (Cincinnati, OH, USA) 213
Evolution of membranes in commercial air separation
R. Prasad, F. Notaro and D.R. Thompson (Tonawanda, NY, USA) 225
Interfacial polymerization of thin polymer films onto the surface of a microporous hollow-fiber membrane
A. Parthasarathy, C.J. Brumlik, C.R. Martin and G.E. Collins (Fort Collins, CO, USA) 249
Dense polymer film and membrane formation via the dry-cast process. Part I. Model development
S.S. Shojaie, W.B. Krantz and A.R. Greenberg (Boulder, CO, USA) 255
Dense polymer film and membrane formation via the dry-cast process. Part II. Model validation and morphological studies
S.S. Shojaie, W.B. Krantz and A.R. Greenberg (Boulder, CO, USA) 281
Metal composite membranes for hydrogen separation
A.L. Athayde, R.W. Baker and P. Nguyen (Menlo Park, CA, USA) 299
Composite cellulose acetate/poly(methyl methacrylate) blend gas separation membranes
B. Bikson, J.K. Nelson (Norwood, MA, USA) and N. Muruganandam (Bound Brook, NJ, USA) 313
Wet spinning of integrally skinned hollow fiber membranes by a modified dual-bath coagulation method using a triple orifice spinneret
S.-G. Li, G.H. Koops, M.H.V. Mulder, T. Van den Boomgaard and C.A. Smolders (Enschede, Netherlands) 329
